

500 final-year registrations. 7 days. ₹2,000.

– ~~Buy ads for a workshop~~

+ **Make the product the channel**

Give every student a better version of the project they already have — then make sharing it the easiest thing on the page.

The math says: don't buy registrations.

Budget	₹2,000
Est. cost per paid registration (student Instagram ads)	~₹35
Registrations ₹2,000 can buy	~57
Share of the 500 target	~11%

So 9 in 10 registrations must come from students themselves.

ESTIMATES – VALIDATED BY THE DAY 2-4 PAID TEST

AI-ify

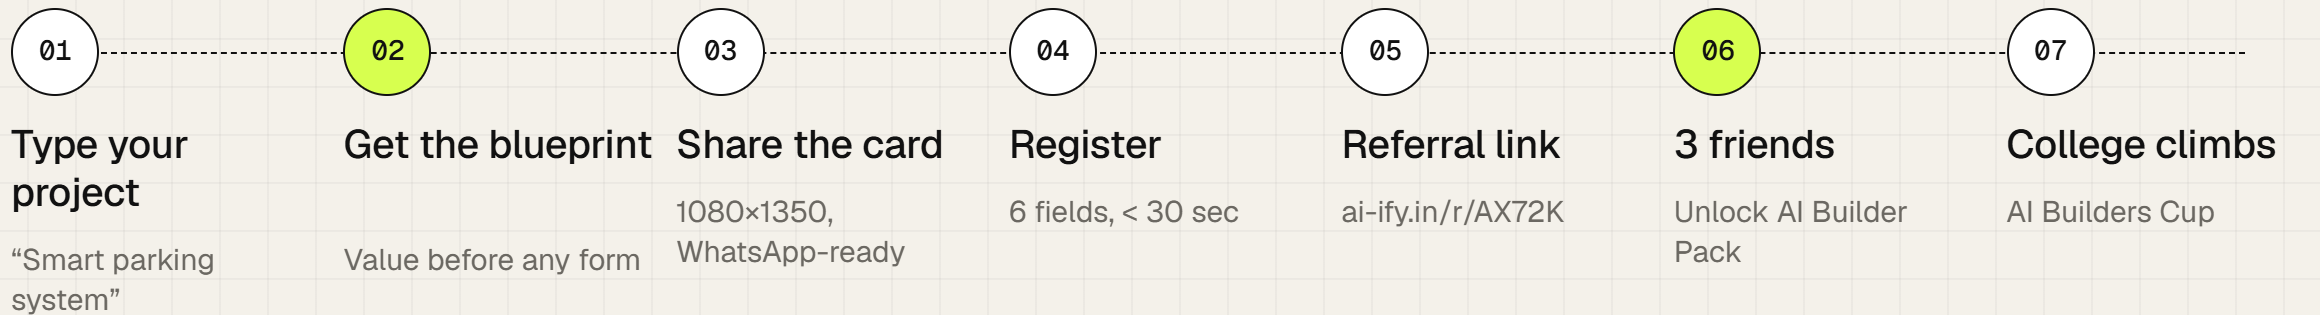

THE INSIGHT

Final-years don't want to “learn AI”. They want **their own project** to stand out.

October is placements and project reviews. A 60-minute workshop sounds like homework; a stronger version of the project they'll defend in an interview sounds like a shortcut.

So we lead with value: AI-ify the project they already have. Registering is the next step, not the entry fee.

Every step is a reason to share.

K ≈ 0.5

Every 2 registrants bring 1 friend. On 335 seeded registrations that's ~165 more.

3 share moments

The blueprint card, the referral link, and "your college is #4".

Never dead-ends

No AI key, slow API or no backend? A 26-pattern fallback still gives every student a result.

Five channels. Half the budget is one experiment.

CHANNEL	HOW	REGISTRATIONS	SPEND
College WhatsApp groups	10 ambassadors × 2 colleges, posting their own share card	200	₹500
Referral loop	Share card + /r/CODE links; AI Builder Pack at 3 friends	165	₹0
Posters + QR	100 A5 posters: labs, canteens, notice boards (?source=poster)	60	₹500
Coding clubs · LinkedIn · Instagram	Club leads post the card; one tracked link per club	45	₹0
Paid experiment	Instagram boost, 2 creatives A/B, scale the winner	30	₹1,000
Total	Prizes ₹300 / 100 / 100 · posters ~₹5 · ads ₹500 test + ₹500 scale	500	₹2,000

Seed, spread, decide, scale.

Day 0	Prep	10 ambassadors, tracked links + QR per channel, posters printed, demo run end to end		0
Day 1	Seed	Ambassadors post their own AI-ified project card in class groups		60
Day 2	Spread	Posters up · coding clubs post · paid A/B starts (₹500, 2 creatives)		130
Day 3	Rivalry	First AI Builders Cup post: “Your college is #4”		210
Day 4	Decide	Read the experiment, kill the loser, ambassador leaderboard		290
Day 5	Scale	Last ₹500 behind the winner · nudge everyone at 1–2 / 3 friends		370
Day 6	Push	College-vs-college push in groups · “one more friend” reminder		440
Day 7	Close	Last call + workshop reminder · final cup standings		500

CUMULATIVE REGISTRATION TARGET · TRACKED LIVE IN /ADMIN BY DAY AND SOURCE

Measure every step. Change one thing at a time.

Visit → starts typing 45%

Typing → gets a blueprint 85%

Blueprint → opens registration 35%

Opens form → registers 75%

Registers → shares 50%

Every link carries ?source=. A channel under 5% visit → registration after 300 visits gets cut on Day 4.

THREE TESTS

01

Value first vs form first

AI-ify before registering beats a register-first page

METRIC · REGISTRATIONS ÷ VISITORS

02

Share card vs plain link

Their own blueprint card gets more friends to click

METRIC · INVITE OPENS PER SHARER, K

03

College rivalry vs personal reward

“Your college is #4” spreads further than “unlock the pack”

METRIC · SHARE RATE, K
